Math 107: Introduction to Linear Algebra

Esen Aksoy, esaksoy@ku.edu.tr, SCI 114

**** Video recordings for this course will NOT be available. ****

Exams and Grading: Your grade at the end of the semester will be assessed based on a midterm exam, and a final exam according to the formula:

Midterm Exam %40+ Final Exam: %60.

I will use "grading on a curve" to assign the letter grades at the end of the semester.

Attendance: This course will be face to face only. I highly recommend that you show up for every lecture, although attendance will NOT be taken during the lectures or the problem sessions.

Problem Sessions: The problem sessions meet once every week. During these problem sessions, your TA will show you the solutions of some of the exercise problems in the book.

Make-up Policy:

If you miss the midterm exam or the final exam, then you are eligible to take the make-up exam under the following conditions:

- (1) You must let me know by email before the exam (preferably on the day of the exam) that you will not be able to take the exam for medical reasons. In that case, you should email me a doctor's report within 3 days.
- (2) If you start an exam, you cannot ask for a make-up.

Textbook: Linear Algebra and its Applications (6th Edition)

by David C. Lay, Stephen R. Lay and Judi J. McDonald

Course Description: Vectors; matrices and systems of linear equations; vector spaces; linear transformations; orthogonality; algebra of complex numbers; eigenvalue problems
